

KD Series Diagnostic Couplers

Introduction

KD couplers provide easy connection to mechanical gauges or specialised diagnostic equipment. KD nipples are usually permanently threaded in the test ports on the machine with the coupler attached to the test instrument.

Construction

- ◆ Carbon steel with trivalent plating
- ◆ Standard seals Nitrile

Features

- ◆ Pin type valve
- ◆ Critical parts are hardened for durability
- ◆ Socket and plugs are machines from solid bar stock

Specification

- ◆ Operating temperature with standard NBR seals -20°C (-20°F) to 120°C (248°F)

Size	1/4
MWP (PSI)	6000
Flow (LPM)	2.0

Applications

- ◆ Agriculture
- ◆ Mobile equipment
- ◆ Construction equipment

Any application where test equipment is used

Part #	Thread
KDF-04G	BSP 1/4
KDM-04FG	BSP 1/4
KDM-M14M	M14*1.5

KD coupler with T20 connection

Part # KDF-T20
