

1/2 Metal Parking Station

Description:

The ISO A 1/2" Male Coupling Parking Station is a simple but essential accessory for anyone using hydraulic quick release couplings. Designed to hold the male side of an ISO A 1/2" coupling securely when disconnected, it prevents dirt, water, and other contaminants from entering the system – a common cause of hydraulic failure. Whether you're working in agriculture, construction, forestry, or any environment where hydraulic equipment is exposed, this parking station ensures your couplers stay protected, clean, and always ready for use.

Applications:

- Compatible with ISO A 1/2" Male Couplers – Designed to securely hold and protect hydraulic quick release couplings when not in use
- Material: Carbon Steel
- 6.4mm Mounting Hole
- Prevents Dirt Ingress & Damage – Keeps the male coupling clean, dry, and free from contaminants, extending service life
- Male Coupling NOT Included

Part # S1M-08PS
